

## Zooming in on the effects of plastics in the marine environment

## Alexandre M. Schönemann

He is a Predoctoral Investigator at Universidade de Vigo. He studied Marine Sciences and a master on Oceanography at Universidad de Cádiz. He has worked on different subjects related to Ecology, from the study of the meadows of marine phanerogams to research the life cycle of several jellyfish species.

Now he is developing his doctoral thesis on the adverse effects of plastic additives in sea fishes, using molecular tools as proteomics.

## 13 GRADOS

We are a non-profit Galician cooperative. We aim to translate marine knowledge and what happens below the ocean waters to accessible visual contents through drawings, audiovisuals, books or activities that connect people to the sea from a perspective of conservationism and sustainability.
